

CHARACTERISTICS

CALCIFOL ULTRA is a liquid nutritional corrector based on natural calcium with the absence of nitrogen and chloride, easily absorbed by both the leaves and roots. It is designed to prevent or correct calcium deficiencies, ensuring the correct development of all plant tissues, particularly those most sensitive such as roots, leaves, flowers and fruits. Its formulation with the absence of nitrogen is ideal for the final cycles of fruit development or other reserve organs, where nitrogen can be very detrimental to the quality of the fruits. **CALCIFOL ULTRA** constitutes a source of calcium without the addition of nitrogen or chlorides.

DECLARED CONTENT	% w/v	% w/w
Calcium oxide (CaO) water soluble	6.7	6.0

pH: 5.0

INDICATION OF CROPS, DOSES AND RECOMMENDED TERMS OF USE

It is recommended for foliar application and irrigation at the following recommended doses:

APPLICATION	CROPS	DOSES
Foliar*	General	2-5 L/ha per application
Irrigation**	Fruit trees	10-15 L/ha per application every 10-15 days
	Horticultural	7,5-10 L/ha per application every 7-10 days
Hydroponics	General	0,75-1 ml/ha per application under technical advice

*Using a minimum water volume of 200 L/ha

**Dose for drip, sprinkler and pivot irrigation systems.

COMPATIBILITY

Do not mix with fertilizers that contain phosphorus or sulfur (sulfate ion). In case of doubt make a test.

STORAGE INSTRUCTIONS CONCERNING THE TEMPERATURE AND THE PREVENTION OF ACCIDENTS

Do not store below the crystallization temperature.
